

China (Chongqing) International Metallurgy and Casting Industries

Expo.2012

To further explore both China and overseas market, promote the import and export of the technologies, equipment, and products in fields like metallurgy, casting and heat treatment and strengthen the communication and cooperation between Chinese enterprises and overseas partners, China (Chongqing) International Metallurgy and Casting Industries Expo 2012 will be held by Beijing Dingcheng Chuangying International Exhibition Co., Ltd. for Sept.21 to 23, 2012 at the Chongqing International Convention & Exhibition Center.

Market Overview

China (Chongqing) International Metallurgy and Casting Industries Expo 2012 is one of China's most influential exhibitions. The following metallurgy fields are included in this exhibition: raw materials manufacture and refine, steel production, non-ferrous metals, casting, electric furnace steel-making, testing, environmental protection, metal processing, consultancy, design and service etc. Because of the changes of exhibits, the visitors of this exhibition are increasing. Apart from the visitors from traditional fields such as steel mills, metal processing & non-ferrous metal processing factories, steel users, steel refine factories, steel traders, accessories & system suppliers, logistics etc, there are also many other from fields like automobiles, planes, railway locomotives, ship manufacture, structure engineering, metal sheet manufacture, machinery and equipment engineering etc. Those visitors will surely bring better effects for the exhibitors. In last year's exhibition, there are 1100 exhibitors in total, in which including many famous enterprises both in China and overseas like Siemens, Emerson, Raytek, DAG, EVG. SEW, VOLCLAY, MINELCO, Ashland, Baosteel Group, Angang Steel Group, Hebei Steel Group, Taishan Steel, Wuyang Steel etc,. The total exhibition area (the rooms and outdoor) is 53400 m² and the number of the visitor is 30000.

Exhibit Profile

- raw material and main material processing equipment; steel profile equipment; metallurgy mill equipment & still rolling mill equipment and components; steel making machinery; non-ferrous metal molding; steel mill; steel refining equipment, environmental protection and gas purification equipment and systems; non-ferrous metal machine parts; non-ferrous manufacture equipment; electrical engineering; processing control technologies; cast steel equipment; non-ferrous casting equipment; testing and control technologies; consultancy, plan and service.

- Iron castings, steel and plastic castings; forging; non-ferrous metal castings (aluminum, zinc, copper, magnesium, etc), sinter, trade and logistics.

- Industrial furnaces, industrial heat treatment equipment; heat treatment technologies applied in such fields as hot metals, ore, ferrite, glass, porcelain enamel, non-ferrous metals, steel, non-ferrous materials etc. Special equipment: cooling, library equipment, purification, heat exchange equipment, chimneys technologies Components, equipment and other articles; accesories, heating, treatment and transmission technologies, gas preparation (Inert gas, reactant gas and regeneration), career security and engineering, consultancy, design and service engineering; industry associations, professional publishing companies etc;

- Pressure Casting: pressure casters in cold/hot chambers(aluminum、copper、zinc and magnesium alloy) & parts and fittings, design and production for pressure casting mold.
- Casting factories and assembly equipment, cutting processing; test and control technologies; surface treatment; construction, engineering; exhaust emission and ventilation technologies; heat treatment and drying furnaces; refractory material technologies; industrial security and ergonomics; 3D shaping; casting molding; casting sand processing and old sand regeneration; casting and stirring; knapped molding, casting cleaning and processing; welding and cutting, sand molding; transportation and storage; molding and tooling; furnace factories, metal charging equipment; mini-electric accessories; casting machinery; casting equipment; compressed air technologies; environmental protection and waste removal.

Booth Charges & Advertisements:

- International standard Booth: (3m × 3m) USD 3000; (3m × 4m) USD 3800
- Raw Space: 36 m²(minimum rented): USD 300 /m²;
- Cover (RMB 18000); back (RMB 15000); Cover (RMB 10000); Cover / former Fei a (RMB 8000), black and white inside pages (RMB 3000); color pages (RMB 5000).
